# Product Portfolio

## Thermoplastic

Celazole® PBI

AURUM™ TPI  
Thermoplastic Polyimide

DEXNYL® R-PEEK 143G

PFLUON PEEK

DEXNYL® PEI

## Thermoset

DEXNYL® 500 PI-s

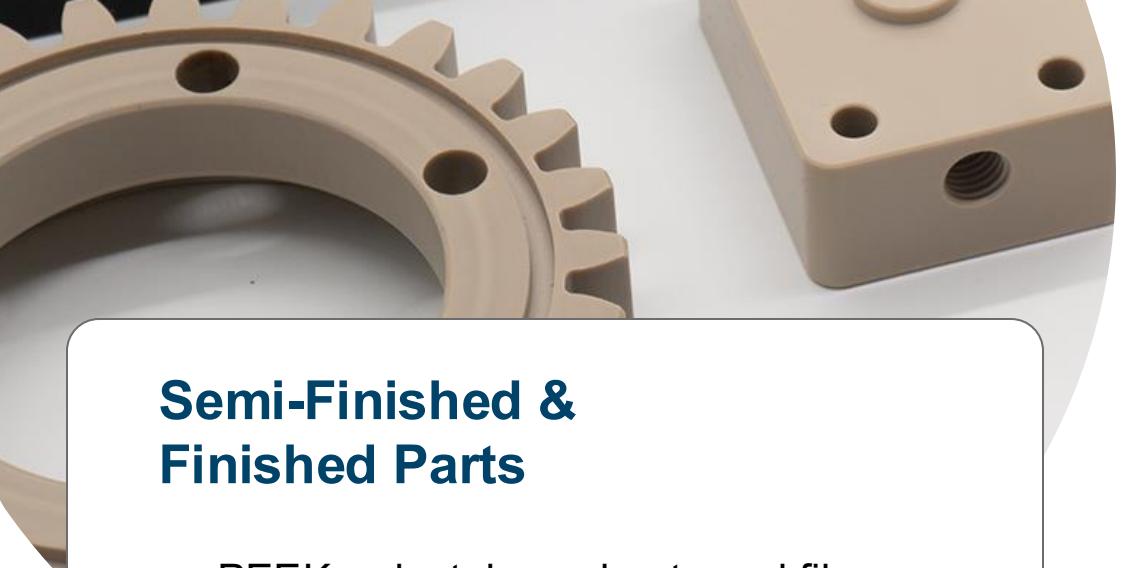

Meldin® 7000 PI-s

DEXNYL® PAI

> 250°C  
ultra Polymers

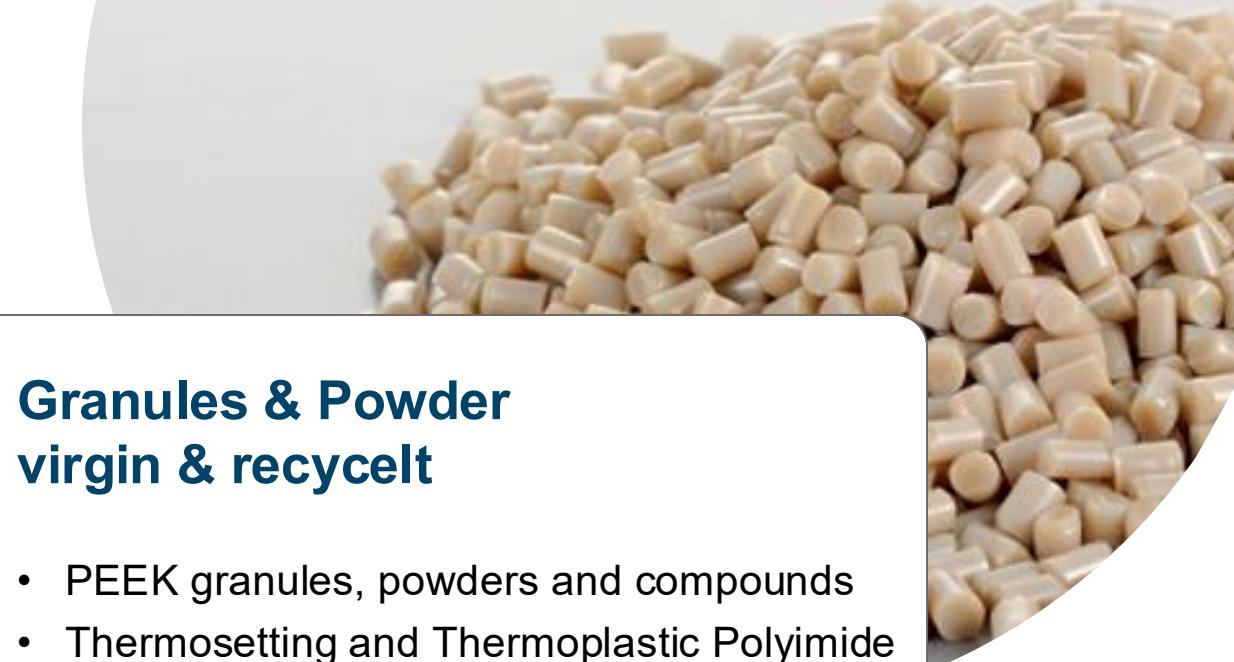

> 200°C  
High Performance Polymers

< 200°C  
High Temperature Engineering Polymers

## Semi-Finished & Finished Parts

- PEEK rods, tubes, sheets and films
- Polyimide rods, tubes, sheets and films
- PAI rods, tubes and sheets
- PBI rods, tubes and sheets
- PEI rods and sheets
  
- Injection & compression molded parts
- Direct formed parts
- Machined parts
- Micro moulded parts

## Granules & Powder virgin & recyclelt

- PEEK granules, powders and compounds
- Thermosetting and Thermoplastic Polyimide granules, powders and compounds
- PAI powders & granules
- PEI compounds
- PBI & PBI PEEK compounds
  
- R-HPP's sprues, regrinds, shavings
- R-PEEK granules, R-compound
- R-PI powders & R-PEI regrid

# Suppliers

- Pfloun, PEEK
- Saint-Gobain, Meldin® 7000 PI-s Series
- Mitsui Chemicals, AURUM® TPI
- ATSP Innovations
- AGY, Glass fiber
- PBI Performance products, Celazole® PBI Compounds

PEEK, R-PEEK PI-s, PEI, PBI and PAI granules and semi-finished products under own brand DEXNYL®

# HHPs Market – Our View

- Supplier driven market with few specialized distributors
- Metal replacement
- Growing market because of increase in Electric/Electronic production. The output of smaller engines rises (eg. turbo), medical advances, composite-developments, Innovative coating, etc
- Technology-driven, products are still unknown to many potential users
- Specialized distributors like BIEGLO can offer a tailored program for HPP applications / market-segments
- BIEGLO openly communicates with customers and suppliers
